# GITHUB

## What is Github ?

It is a service especially for engineers to create projects

## What it's for Github ?

A platform that allows you to save or preserve a code repository

## How does it work ?

Its main function is to store projects that allows others to cooperate with them

# How we can create a repository in Github?

**1**

first go to home and go to the +
to select New repository

**2**

Then put a name tu remenber and find easy

**3**

modificate in the way for you
preference and put "create
repository"

# How we can uplow a file in Github?

**1**

Go to the Home of reposary, the
press  uploading an existing file
to go to another web

Quick setup — if you've done this kind of thing before

Set up in Desktop | or | HTTPS | SSH | https://github.com/MrAlvaroBriones/First-Repository.git

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.
**2**

Upload the file that you want

Drag files here to add them to your repository
Or choose your files
